New & Experienced Implant Dentists Bone Management, Grafting w/ Implant Placement

Experience the New Technology in person:

New dentists, this is a perfect time to begin your implant journey! for experienced implantologists this technology will seem magical by providing initial stability that you never dreamed possible!

- New patented **Bone Expansion & Bending - star shaped instruments**. No drill surgery, this next generation of osteotomes is now available in stand-alone B.E.B. Kit! **Ideal for Sinus bumps**
- New drills that also harvest bone - **single drill, then implant placement!**
- New implants engineered to preserve bone - patented "Fin" thread: **90% bone 10% Titanium - the new formula** for initial stability and fast healing success!
- **Platform Switching** - All 7 implants use the same abutment
- **Revolutionary Sinus Lift Instrumentation** - Crestal lift 10+ mm

"Bone Bending" Technology!

"The hands on mentoring is priceless!..it gave me the confidence to provide these services to my patients. The mentor was available at all phases of treatment and that put my mind at ease. Best and only way I recommend anyone to incorporate implant services in their practice!"

Dr. Kamlesh Makwana, St Louis MO

"The IBS system has been a game changer for me. Primary stability using the magic fin thread is unprecedented and gives me the ability to early load those implants which saves chair time and healing time. The surgical kit is a game changer as well... Simply put, it is the best system I have ever seen and I highly recommend it to anyone."

Dr. Pieter Linssen, El Dorado Hills, CA

"We place over 1000 implants a year. This system is very simple, we get exceptional primary stability even in soft bone. I've never seen a system like this before. I really enjoy using it."

Dr. Cacacci, Munich, Germany
Internationally acclaimed implantologist

Tucson, Arizona

October 27-28, Bone Grafting w/ Implant Placement one and a half-days. For new and experienced with bone grafting bone management for implant placement topics by Dr. Geoffrey Berg. **We invite you to BRING YOUR STAFF to this training.** The staff is trained on participates in hands-on and receives specialized materials: billing, codes, surgical protocols, equipment care and more.

After course support! At the course meet your mentor who gives **one-on-one Mentoring** - Now you have a trusted friend to help with cases one by one. Step by step your skills advance.

Vision - We envision a new era of implant dentistry where all general dentists confidently participate in all phases of implant dentistry. Where an inner circle of experts collaborate, mentor and support colleagues. Where patients stay with their dentist for ALL implant procedures. Where the best technology is employed for custom solutions designed specifically for general dentists. The aim of this course is to fulfill this vision for its attendees.

Mentoring - imagine a hand picked implantologist who will teach and guide you for months. If there is one thing that can transform dentists into implantologists, it is having a trusted colleague by their side helping them walk the path. Meet your mentors at this course!

The Technology - Unprecedented initial stability - The unique "Magic Fin" thread design features 10% titanium and 90% natural bone undisturbed bone. Faster healing!

Implants - *Unique patent pending "Fin" thread design, platform switching, all implants use same prosthetics parts.*

Instrumentation - *featuring "the best surgical kit in the world". Plus precision, finely crafted instruments featuring exact cutting bone drills and proprietary star shaped osteotomes.*

Protocols - *Bone quality centric, reliable bone sensitive techniques coupled with progressive steps makes placement outcomes predictable through repeatable steps- planning location, preparing angle and depth, then confident placement.*

Educator - All courses are taught by clinicians who treat patients, and have experience teaching and mentoring colleagues.

Dr. Geoffrey Berg is an active dentist, a seasoned implantologist and one of our hand picked national implant trainers.

CE Credits - This course qualifies for 12 hours of continuing education credit.

Teaching Methods - Lecture and hands-on exercises.

Prerequisite - No prior experience is required.

Course Cost - Tuition is only \$995 (\$1495 value) Staff/ Assistants tuition \$99 (\$199 value) and includes hands-on exercises, light breakfast and lunch.

The Course Series - Speak to our customer service team to register for the series. Early bird specials are available.

Cancellation & Refund Policy Dates and locations are subject to change. Any cancellation by a registrant within 7 days of the course may be charged a processing fee which may be applied to a future courses.

Treatment Planning Registrants are encouraged to bring their cases including patient history, x-rays, models to the course. Details will follow upon registration.

Venue & Accommodations - Courses are normally held at locally owned Marriott Courtyards. The address of this course will be forthcoming.

Special room rates: IBS of America/InnoBioSurg
